1. "Incidents" are the average number of emergencies attended by NYFRS per year in that station's area. The averages are based on 5 years worth of data.
2. "Fire Engine Cost" is the average annual staff cost of providing that fire engine. It varies depending on how it is crewed.
3. "Fires" are all fires within a station's area.
4. "RTC’s" are road traffic collisions within a station's area that NYFRS has attended.
5. "False Alarms" are where a fire engine has been sent to an incident that turns out not to be a fire or other emergency.
6. "Others" includes all other kinds of incidents including flooding, rescues from heights, assisting other agencies, etc.
